SUMMARY I am a Mechanical Engineer who made a career switch to Web Development. I had experiences with Wordpress and realized I would like to work in this field. Since August 2021, I am improving my skills on HTML, CSS, BOOTSTRAP, JAVASCRIPT. I made a short introduction into REACT. My personality characteristics are; empath, self motivated, researcher and calm. I have no military obligation. I would like to be a part of your team without any payment to perform my skills as long as improving myself. No problem with working on Remote or in office. I have 7 years of driving experience.
